PROJECTS / WORK EXPERIENCE

Freelance Work

📅 2022 📍 Worldwide

- Managed 3 client websites while utilizing HTML, CSS & Javascript
- Used modern Javascript frameworks to create conference organizing applications for clients across two continents
- Created a scheduling application used by over 100 people at one event

Investment Calculator

📅 03/2022

I disliked the UI & features of many investment calculators... so I created my own

- Created investment calculator to determine when your salary will increase and improved accurate investment analysis by up to 10%
- Used React to create UI components which created an attractive and responsive UX compared to competitive investment calculators

🌐 <https://compound-interest.online/>

Flashcards

📅 03/2022

A flashcard building tool, for people to create and view flashcards.

- Used React and REST API to create an open source flashcard website which allowed users to create pro version Quizlet sets for free - used by 4 classmates

🌐 <https://flashcard.digital/>

Virtual Bar Training

📅 08/2021

A platform where users can practice and test bar knowledge

- Worked remotely alongside team of 6 to identify learning aspects needed for job success, which decreased training costs by 20%
- Created and developed website used for learning bar skills which increased positive reviews by 15%

TRAINING / COURSES

Complete NodeJS Developer

Zero to Mastery

📅 2022

- Built 2 enterprise-level Node applications then deployed them to cloud (AWS)
- Used NodeJS to create production-grade apps including REST APIs and GraphQL APIs
- Construct a MERN (MongoDB, Express, React, Node) full-stack application and deploy to production
- Ensured load balancing, monitoring, CI/CD, and 0 downtime deployment

React- The complete guide

Acedemind

📅 2021

- Built powerful, fast, user-friendly, and reactive web apps
- Leveraged the power of JavaScript to use and improved user experiences - creating websites with performance scores of above 90%
- Utilized tools including Animations, Routing, and Next.js

The Result-Oriented Web Developer Course

Vertex Academy

📅 2021

- Managed 3 projects through design and development with budgets of up to 50 USD
- Used JavaScript, HTML5, and CSS3 to write clean code which increased analysis efficiencies

SUMMARY

Software Developer with experience in developing responsive, functional and complex websites with skills in React, HTML and CSS.

Developed training website which allowed colleagues to remotely practice and learn skills which decreased costs by 15%.

Seeking Frontend Engineering where I bring my product led motivation and proactivity, in supporting your mission to form new ways for product people to control the software experience.

STRENGTHS

Team Work

Worked alongside 5 teams of 5 in across three countries to improve guest experience in hotels.

Proactivity

Used JavaScript, HTML5, and CSS3 to write clean code which increased analysis efficiencies.

Agile

Worked alongside team of 6 to develop a job training website while using Agile methodologies which decreased the cost of personnel training by 20%.
